

PROJECT MOZ

What is Project Moz?

Project Moz was founded in 2008, and is a UK registered charity developed to help Mozambican people that have started out with, or ended up with, nothing. It is a UK created Christian charity that financially supports existing work being carried out in Mozambique, principally the care of orphaned and abandoned babies and children. It also helps to create and maintain community projects.

Sponsoring a child costs £20 a month

Sponsoring a child

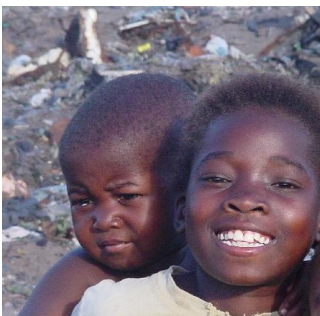

We run a sponsorship program that offers support to an existing orphanage in Mozambique. Sponsoring a child not only contributes towards food, clothes, medicine and education, it also gives the child hope knowing that someone on the other side of the world cares about them.

Community Projects

Below are some examples of the community projects that Project Moz supports...

Jewellery making business

Care and reintegration of street children

Children's health clinic

Food parcels for families

Fundraising in 2010

Our main project for 2010 is the build of a house for 15 children and the staff who care for them on a plot of land in Matola, Mozambique. This project is named 'Casa Gemma' in memory of one of our supporters.
